

#### **Features**

- Suitable for Han D® crimp contacts
- · High packing density

### Technical characteristics

Number of contacts Rated current 10 A Rated voltage 160 V Rated impulse voltage 2.5 kV Pollution degree Rated voltage acc. to UL 250 V  $>10^{10} \Omega$ Insulation resistance Contact resistance ≤3 mΩ Limiting temperature -40 ... +125 °C Mating cycles ≥500

Mating cycles with other HMC ≥10000

Mating cycles with other HMC components

## **Derating**

#### **Current carrying capacity**

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.
