

Your configuration:

The right connectivity solution for every application!

Light weight

Thanks to the used material the Han® 1A has a weight advantage in comparison to connectors that are e.g. made of metal.

Shock and vibration resistant

The Han® 1A product series provides a high reliable connection even under shock and vibration conditions.

Versatile concept

Build your own connectivity solution by using the modularity advantage of the Han® 1A with inserts covering power, signal and data transmission. Together with all accessory parts the Han® 1A is a very flexible system usable for a broad range of applications.

Time saving

Due to the easy mate and click design of all single components the assembly of the connector is done within seconds – and there are no tools needed.

Space saving

The Han® 1A components are designed to fulfil the trend of miniaturisation – while being still a robust Han® connector also for harsh environments.
